Clima Cork System

Vibram | Sympatex | CCS | Kevlar Insock | VHR textile – Very High Resistance
100% non metallic | Toe Reinforcement

Clima Cork System

CLIMA CORK SYSTEM (CCS) is an exclusive system of LAVORO, which allows to create a natural environment for the feet, both in the field of temperature and their accommodation in shoes. Through the inclusion of an insulating layer of cork between the sole and the insole, CLIMA CORK SYSTEM regulates the heat and cold inside the footwear and gives extra comfort. The cork allows the creation of a kind of "footprint", favors its adaptation to the shoe and contributes to the reduction of fatigue, by benefiting the uniform distribution of the weight.

SPODOS - Foot Science Center

As even minor irritations can reduce mobility or productivity and increase absenteeism, it is important, under any foot health circumstance, to get advice from a podiatrist - which LAVORO makes available through SPodos, its Foot Science Center. After all, as a celebrated proverb says, 'even the tallest towers begin on the ground'!
